SUMMARY

I am a passionate technical professional keen on using technology to invent new avenues leading towards excellence in any job I take up. I am confident of my ability in software development, data analysis and information systems. I am a constant learner, ready to prove my capacity and adapt quickly to new innovations and environments. I am a team player who can work in collaboration while being ready to take up challenges and responsibilities as the situation demands. I am focused in learning and developing advanced skills in software development and IT operations.
